LIST OF PUBLICATIONS OF NEDIALKA ILIEVA STOILOVA

1. K. Tzerova, M. Sarafova, R. Gacheva, N. Ilieva, N.Balabanov, Neutron methods for measurement of the thickness of etalon coverings,

   Nauchni Trudove, University of Plovdiv, **23**, 59 (1985).

2. T.D. Palev, N.I. Stoilova, Finite-dimensional representations of the Lie superalgebra $gl(2/2)$ in a $gl(2)\oplus gl(2)$ basis. II.Nontypical representations,

   Journ. Math. Phys. 31 953-988 (1990), **IF 1.102**, Web of Science: Q2.

3. T.D. Palev, N.I. Stoilova, Finite-dimensional representations of the basic Lie superalgebra $A(1/1)$ in a $sl(2) \oplus sl(2)$ basis,

   Preprint INRNE-TH-90, Sofia (1990).

4. T.D. Palev, N.I. Stoilova, $Osp(3/2)$ noncanonical quantum oscillator,

   Sakharov Memorial Lectures in Physics, p.283-290, (Eds. L.V.Keldysh and V. Ya. Feinberg, Nove Sci. Publ. New York), Proceedings of the First International Sakharov Conference on Physics, Moscow, May 27-31, 1991.

5. T.D. Palev, N.I. Stoilova, Classification of all three-dimension noncanonical quantum oscillators generating classical Lie superalgebras,

   Classical and Quantum Systems - Foundations and Symmetries, p.318-321, (Eds. H.D.Doebner, W.Schehrer, Schroeck, World Sci Pub. 1993). Proceedings of the II International Wigner Symposium, July 16-20, 1991, Goslar, Germany.

6. N.A. Ky, T.D. Palev, N.I. Stoilova, Transformations of some induced $osp(3/2)$ modules in an $so(3) \oplus sp(2)$ basis,

   Journ. Math. Phys. 33, 1841-1863 (1992), **IF 1.102**, Web of Science: Q2.

7. T.D. Palev, N.I. Stoilova, Wigner quantum systems: Noncanonical $osp(3/2)$ Oscillator,

   Preprint Concordia University 1/92, Montreal (1992).

8. T.D. Palev, N.I. Stoilova, On a Possible algebra morphism of $U_q[osp(1/2n)]$ onto the deformed oscillator algebra $W_q(n)$,

   Lett. Math. Phys. 28, 187-193 (1993), **IF 0.922**, Scopus: Q2.

9. T.D. Palev, N.I. Stoilova, Finite-dimensional representations of the quantum superalgebra $U_q[gl(3/2)]$ in a reduced $U_q[gl(3/2)] \supset U_q[gl(3/1)] \supset U_q[gl(3)]$ basis,

   J. Phys. A 26, 5867-5872 (1993), **IF 1.480**, Web of Science: Q1.

10. T.D. Palev, N.I. Stoilova, J. Van der Jeugt, Finite-dimensional representations of the quantum superalgebra $U_q[gl(n/m)]$ and related q-identities,

    Commun. Math. Phys. 166 367-378 (1994), **IF 1.651**, Web of Science: Q1.

11. T.D. Palev, N.I. Stoilova, Wigner quantum oscillators,

    J.Phys. A 27, 977-983 (1994), **IF 1.480**, Web of Science: Q1.

12. T.D. Palev, N.I. Stoilova, Wigner quantum oscillators. Osp(3/2) oscillators,

    J.Phys. A 27 7387-7401 (1994), **IF 1.480**, Web of Science: Q1.

13. T.D. Palev and N.I. Stoilova, Wigner quantum oscillators,

    Proceedings of the Yamada Conference XL and XX ICGTMP, Toyanoka, Japan, July 4-9, 1994 (Eds. A. Arima, T. Eguchi, N. Nakanishi, World Scientific Pub. Co Pte, 1995), p. 386-389.

14. Nguyen Anh Ky, N.I. Stoilova, Finite-dimensional representations of the quantum superalgebra $U_q[gl(2/2)]$. II: Nontypical representations of generic,

    Journ. Math. Phys. 36 N 10, 5979-6003 (1995), **IF 1.102**, Web of Science: Q2.

15. T.D. Palev and N.I. Stoilova, Unitarizable representations of the deformed para-Bose superalgebra $U_q[osp(1/2)]$ at roots of 1,

    J. Phys. A 28 7275-7285 (1995), **IF 1.480**, Web of Science: Q1.

16. T.D. Palev and N.I. Stoilova, New solutions of the Yang-Baxter equation based on root of 1 representations of the para-Bose superalgebra $U_q[osp(1/2)]$,

    J. Phys. A 29 709-719 (1996), **IF 1.480**, Web of Science: Q1.

17. T.D. Palev and N.I. Stoilova, Many-body Wigner quantum systems,

    Journ. Math. Phys. 38 2506-2523 (1997), **IF 1.102**, Web of Science: Q2.

18. T.D. Palev and N.I. Stoilova, Representations of the quantum algebra $U_q[gl(\infty)]$,

    Preprint Univ. of Queensland, UQMATH-arc-9620.

19. M.D. Gould and N.I. Stoilova, Casimir invariants and characteristic identities for $gl(\infty)$,

    Journ. Math. Phys. 38 4783-4793 (1997), **IF 1.102**, Web of Science: Q2.

20. T.D. Palev and N.I. Stoilova, Highest weight representations of the quantum algebra $U_h(gl_\infty)$,

    J. Phys. A 30 L699-L705 (1997), **IF 1.480**, Web of Science: Q1.

21. T.D. Palev and N.I. Stoilova, Highest weight irreducible representations of the quantum algebra $U_h(A_\infty)$,

    Journ. Math. Phys. 39 5832-5849 (1998), **IF 1.019**, Web of Science: Q2.

22. M.D. Gould and N.I. Stoilova, Eigenvalues of Casimir operators for $gl(m/\infty)$,

    J. Phys. A 32 391-399 (1999), **IF 1.387**, Web of Science: Q1.

23. T.D. Palev and N.I. Stoilova, Representations of the quantum algebra $U_h(A_\infty)$,

    "Lie Theory and Its Applications in Physics II"338-349, Proceedings of the II International Workshop on Lie Theory and Its Applications in Physics, August 17-20, 1997 Arnold Sommerfeld Institute, Technical University of Clausthal, (Eds. H.-D. Doebner, V.K. Dobrev and J. Hilgert, World Sci, Singapore), 1998; ISBN 981-02-3539-9.

24. T.D. Palev and N.I. Stoilova, Highest weight irreducible representations of the Lie superalgebra $gl(1/\infty)$,

    Journ. Math. Phys. 40 1574-1594 (1999), **IF 0.976**, Scopus: Q2.

25. T.D. Palev and N.I. Stoilova, A description of the quantum superalgebra $U_q[sl(n+1|m)]$ via creation and annihilation generators,

    J. Phys. A 32 1053-1064 (1999), **IF 1.387**, Web of Science: Q1.

26. T.D. Palev, N.I. Stoilova and J. Van der Jeugt, A new description of the quantum superalgebra $U_q[sl(n+1|m)]$ and related Fock representations,

    "Quantum Theory and Symmetries", Proceedings of the International Symposium on Quantum Theory and Symmetries, July, 18-22, 1999, Goslar, Germany, (Eds. H.-D. Doebner, V.K. Dobrev, J.-D. Hennig and W. Lőcke, World Sci, Singapore), 437-441 and math.QA/9911169.

27. T.D. Palev, N.I. Stoilova and J. Van der Jeugt, Fock representations of the superalgebra $sl(n+1|m)$, its quantum analogue $U_q[sl(n+1|m)]$ and related quantum statistics,

    J. Phys. A 33 2545-2553 (2000), **IF 1.365**, Web of Science: Q1.

28. T.D. Palev, N.I. Stoilova, Wigner quantum system, pp. 358-360,

    in *Concise Encyclopedia of Sypersymmetry and noncommutative structures in mathematics and physics*, (Eds. St. Duplij, W. Siegel, J. Bagger, Kluwer Academic Publishers, Dordrecht), ISBN 1-4020-1338-8, 2003.

29. T.D. Palev, N.I. Stoilova and J. Van der Jeugt, Jacobson generators of the quantum superalgebra $U_q[sl(n+1|m)]$ and Fock representations,

    Journ. Math. Phys. 43 1646-1663 (2002), **IF 1.387**, Web of Science: Q2.

30. T.D. Palev, N.I. Stoilova, Wigner Quantum Systems (Lie superalgebraic approach),

    Rep. Math. Phys. 49 395-404 (2002), **IF 0.624**, Scopus: Q3.

31. T.D. Palev, N.I. Stoilova and J. Van der Jeugt, Jacobson generators of (quantum) $sl(n+1|m)$. Related statistics,

    Proceedings of the Fourth International Conference "Symmetry in Nonlinear Mathematical Physics", July 9-15, 2001, Kiev, Ukraine in Proceedings of Institute of Mathematics of NAS of Ukraine, (Eds. A.G. Nikitin, V.M. Boyko and R.O. Popovych), v. 43, Kyiv, Institute of Mathematics, pp. 478-485 (2002), ISBN 966-02-2488-5.

32. T.D. Palev, N.I. Stoilova and J. Van der Jeugt, Deformed Jacobson generators of the algebra $U_q[sl(n+1)]$ and their Fock representations,

Proceedings of the 2nd International Symposium "Quantum theory and Symmetries", 18-21 July 2001, Krakow, Poland, World Scientific, Singapore, 2002; ISBN 981-02-4887-3, 521-526 and math.QA/0111289.

33. H.-D. Doebner, T.D. Palev and N.I. Stoilova, On deformed Clifford $Cl_q(n|m)$ and orthosymplectic $U_q[osp(2n+1|2m)]$ superalgebras and their root of unity representations,

J. Phys. A 35 9367-9380 (2002), **IF 1.406**, Web of Science: Q1.

34. R.C. King, T.D. Palev, N.I. Stoilova and J. Van der Jeugt, The non-commutative and discrete spatial structure of a 3D Wigner quantum oscillator,

J. Phys. A 36 4337-4362 (2003), **IF 1.357**, Web of Science: Q2.

35. T.D. Palev, N.I. Stoilova and J. Van der Jeugt, Microscopic and macroscopic properties of A-superstatistics,
