

Contents

Part I Plenary Talks

A Lump Solution in SFT	3
Loriano Bonora	
Towards p-Adic Matter in the Universe	13
Branko Dragovich	
Paley Statistics and the Chronon	25
David Ritz Finkelstein	
Some Remarks on Weierstrass Sections, Adapted Pairs and Polynomiality	39
Anthony Joseph	
From Palev's Study of Wigner Quantum Systems to New Results on Sums of Schur Functions	61
Ronald C. King	
Varna Lecture on L^2-Analysis of Minimal Representations	77
Toshiyuki Kobayashi	
Exponential Series Without Denominators	95
Jean-Louis Loday	
New Methods in Conformal Partial Wave Analysis	109
Christoph Neumann, Karl-Henning Rehren, and Lena Wallenhorst	
Euclidean Configuration Space Renormalization, Residues and Dilation Anomaly	127
Nikolay M. Nikolov, Raymond Stora, and Ivan Todorov	
Wigner Quantization and Lie Superalgebra Representations	149
Joris Van der Jeugt	

Part II Quantum Field Theory

Spontaneous Breaking of Supersymmetry, Localization and Nicolai Mapping in Matrix Models	169
Fumihiko Sugino	
Mirror Map as Generating Function of Intersection Numbers	181
Masao Jinzenji	
Operadic Construction of the Renormalization Group	191
Jean-Louis Loday and Nikolay M. Nikolov	

Part III String and Gravity Theories

Lightlike Braneworlds in Anti-de Sitter Bulk Space-Times	215
Eduardo Guendelman, Alexander Kaganovich, Emil Nissimov, and Svetlana Pacheva	
Generalized Bernoulli Polynomials and the Casimir Effect in the Einstein Universe	231
Patrick Moylan	
From Singularities to Algebras to Pure Yang–Mills with Matter	239
Tamar Friedmann	
On Modified Gravity	251
Ivan Dimitrijevic, Branko Dragovich, Jelena Grujic, and Zoran Rakic	

Part IV Quantum Groups and Related Objects

The q-Wakimoto Realization of the Superalgebras $U_q(\widehat{sl}(N 1))$ and $U_{q,p}(\widehat{sl}(N 1))$	263
Takeo Kojima	
Quantum Phases in Noncommutative Space	277
Ö.F. Dayi and B. Yapışkan	
On Quantum WZNW Monodromy Matrix: Factorization, Diagonalization, and Determinant	287
Ludmil Hadjiivanov and Paolo Furlan	

Part V Representation Theory

Some Properties of Planar Galilean Conformal Algebras	301
Naruhiko Aizawa	
Invariant Differential Operators for Non-compact Lie Groups: The $Sp(n, \mathbb{R})$ Case	311
V.K. Dobrev	

Generalization of the Gell–Mann Decontraction Formula for $sl(n, \mathbb{R})$ and Its Applications in Affine Gravity 337
 Igor Salom and Djordje Šijački

W-Algebras Extending $\widehat{gl}(1|1)$ 349
 Thomas Creutzig and David Ridout

Non-Local Space-Time Transformations Generated from the Ageing Algebra 369
 Stoimen Stoimenov and Malte Henkel

Construction of the Noncommutative Rank I Bergman Domain 381
 Zhituo Wang

Part VI Vertex Algebras

Singular Vectors and Zhu’s Poisson Algebra of Parafermion Vertex Operator Algebras 391
 Tomoyuki Arakawa, Ching Hung Lam, and Hiromichi Yamada

Boson-Fermion Correspondence of Type B and Twisted Vertex Algebras 399
 Iana I. Anguelova

On Twisted Modules for N=2 Supersymmetric Vertex Operator Superalgebras..... 411
 Katrina Barron

Part VII Integrability and Other Applications

The Ruijsenaars Self-Duality Map as a Mapping Class Symplectomorphism 423
 L. Fehér and C. Klimčík

Hilbert Space Decomposition for Coulomb Blockade in Fabry–Pérot Interferometers 439
 Lachezar S. Georgiev

Group Classification of Variable Coefficient KdV-like Equations 451
 Olena Vaneeva

A New Diffeomorphism Symmetry Group of Magnetohydrodynamics.... 461
 Asher Yahalom

Invariance Properties of the Exceptional Quantum Mechanics (F_4) and Its Generalization to Complex Jordan Algebras (E_6) 469
 Sultan Catto, Yoon S. Choun, and Levent Kurt

Matrix Superpotentials 477
 Yuri Karadzhov

Part VIII Various Mathematical Results

On Finite W-Algebras for Lie Superalgebras in the Regular Case	487
Elena Poletaeva and Vera Serganova	
Young Tableaux and Homotopy Commutative Algebras	499
Michel Dubois-Violette and Todor Popov	
Fixed Point Factorization	511
Elaine Beltaos	
Differential Invariants of Second-Order Ordinary Differential Equations	521
M. Eugenia Rosado María	
Some Properties of Harmonic Quasi-Conformal Mappings	531
Miljan Knežević	
A Note on the Categorification of Lie Algebras	541
Isar Goyvaerts and Joost Vercruyse	
A Continuous Bialgebra Structure on a Loop Algebra	551
Rémi Léandre
